DISCLAIMERS

DISCLAIMERS	63
-------------------	----

Inflation in India (%)

Consumer Price Index plummets to 6-year low of 2.1% in Jun'25 from 2.82% in May'25, primarily driven by cooling food inflation and positive base effect. Wholesale Price Index (WPI) decreased to -0.13% in Jun'25 from 0.39% in May'25 primarily attributed to a reduction in prices of food articles, mineral oils, manufacture of basic metals, crude petroleum & natural gas, etc.

Index of Industrial Production (%)

Index of Industrial Production (IIP) growth pulled down to 10-month low by 1.5% in Jun'25 from 1.2% in May'25. The growth was primarily driven by a 3.9% rise in manufacturing output, while electricity generation and mining activity both contracted by 2.6%, and 8.7% respectively in Jun'25.

Indian Business Indicators - Purchasing Managers' Index (PMI)

S&P Global India Manufacturing Purchasing Managers' Index (PMI) increases to 16-month high of 59.1 in Jul'25 from 58.4 in Jun'25, benefitting from strong growth in new orders and output. PMI Services decreased to 59.8 in July'25 from 60.4 in Jun'25 as output growth eased compared to the prior month. The reading remains in the expansion zone, as a score above 50 indicates expansion, while a score below 50 denotes contraction.

USD INR & Brent Crude Movement

Brent crude oil increased to US\$ 72.53 on Jul'25 end from US\$ 67.61 on Jun'25 due to raising concerns that rising geopolitical tensions could disrupt oil supplies from the crucial Middle East region. The Rupee closed the month on 87.6 against Greenback as on Jul'25.

Equity Markets - India & US

Bellwether indices, Nifty 50 and BSE Sensex moved down sharply during the month by 2.93% and 2.90% respectively due to signs of weakening earnings momentum among domestic companies in Q1FY26 and the U.S. President announcing a 25% tariff on Indian goods, effective Aug 1, 2025. Continuous selling by foreign portfolio investors added to the downward pressure on the markets, extending the losses. Foreign Institutional Investors (FIIs) net sellers in Indian equities to the tune of ₹ 17,740.5 crore. Gross Goods and Services Tax (GST) collections in Jul'25 stood at Rs. 1.96 trillion, representing a 7.5% rise on a yearly basis and this points towards the growing trajectory of the Indian economy. Dow Jones increased by 0.08% from previous month.

Interest Rate Movement (%) - India & US

Yield on the 10-Year benchmark paper marginally increased, closing at 6.374% on Jul'25 vs 6.324% on Jun'25 as market participants moderated expectations of a near-term rate cut, following hawkish remarks from the RBI Governor. US 10 year G-Sec closed higher at 4.374 on Jul'25 vs 4.228 on Jun'25.

Note: The data/statistics are given to explain general market trends, it should not be construed as any research report/research recommendation. The sector(s) mentioned are for the purpose of understanding only and the Fund may or may not have any future position in these sector(s).

Equity Market Review

Mr. Shridatta Bhandwadar
Head - Equities

Equity Market Update

- ▶ In the month of Jul'25, Nifty 50 dropped sharply by 2.93% due to signs of weakening earnings momentum among domestic companies in Q1FY26 and the U.S. President announcing a 25% tariff on Indian goods, effective Aug 1, 2025. Continuous selling by foreign portfolio investors added to the downward pressure on the markets, extending the losses.
- ▶ Foreign Institutional Investors (FIIs) were net sellers in Indian equities to the tune of ₹17,740.5 crore.
- ▶ Gross Goods and Services Tax (GST) collections in Jul'25 stood at Rs. 1.96 trillion, representing a 7.5% rise on a yearly basis and this points towards the growing trajectory of the Indian economy.
- ▶ The combined Index of Eight Core Industries (Refinery Products Industry, Electricity, Industry, Steel Industry, Coal Industry, Crude Oil Industry, Natural Gas Industry, Cement Industry, Fertilizers Industry) rose by 1.7% YoY in Jun'25, compared to a 5.0% increase in Jun'24. Among the eight sectors, steel and cement recorded the highest growth at 9.3% and 9.2%, respectively. In contrast, coal saw the steepest decline, falling by 6.8%.
- ▶ Globally, U.S. equity markets were rangebound amid concerns over the economic impact of the U.S. President's tariffs, following the announcement of new tariff rates on dozens of countries. Asian and European equity markets declined as new tariffs announced by the U.S. President raised fears of a global economic slowdown, prompting broad-based selling by investors. Additionally, the initial optimism surrounding the EU-U.S. trade deal faded, further weighing on market sentiment.

Note: The past performance may or may not be sustained in the future.
Source: MFI Explorer, ICRA Analytics Ltd. Data as on: 31st Jul'25

Equity Market Outlook

The decision of the US Government to enforce reciprocal tariff on most countries points towards its intent to aggressively pursue and resolve the wrong that it believes it is suffering since the globalisation era. It is estimated that these tariffs are likely to affect trade worth roughly US\$1tn, thereby impacting Global GDP in FY26/27 by 0.5%. India too is likely to suffer a 0.5% impact on its GDP with higher tariffs. Indian situation has clearly gotten complex with Indian tariff being raised to 50% - among highest globally. It would have sizable direct and indirect impact on India – though there is no certainty that it will not change again for better or worse. Although it remains fluid and there is too and from that's happening over last few months. One needs to see how it plays out over next 3-6 months before making any structural view on this aspect.

While the theory of US getting short-changed by its trading partners is debatable, there is little doubt that the country was amongst the biggest beneficiaries of globalisation. As the US dominance in the global economy increased, it benefited from global savings moving back the US to fund its large fiscal and trade deficit at an interest rate of under 3% on an average for the past 15-20 years. On the other hand, the benefits of increased local manufacturing that is being perceived as one of the end goals of these tariffs may not be easy to materialise given ecosystem challenges. Global manufacturing supply chains have been established over the past 40-50 years and are almost impossible to move to the US easily. This is due to various limiting factors that US suffers from like lack of labour skillset and ecosystem to produce these products at competitive costs. Thus, in the near term, the strategy of stepping back from globalisation is likely to hurt US consumers as the cascading effect of these tariffs trickle down in the form of higher inflation, higher real interest rates and lower economic growth.

The global macro environment remains complex as:

- 1) US growth inflation dynamics indicating increased possibility of stagflation.
- 2) Tariff news flow increases business uncertainty and keeps inflation high in an environment where the incremental data points continue to indicate consumer slowdown. If this scenario of global uncertainty elongates, then US might be in for a negative growth surprise, when high headline inflation leaves limited room for the Fed to cut rate beyond current expectations of 50bps in CY25.

U.S. President's policies so far are indicating their inward focus with a multi-polar world and disregard for global trade and defence agreements of previous US establishments. We thus expect uncertainty to prevail both on global growth and capital flows for Emerging markets including India (although latest India – US brawl can hurt this). One possibility is that it may quickly lead to a US recession potentially easing monetary policy, Fed providing liquidity and faster interest rate cuts. US dollar could depreciate under such circumstances, which could be positive for Emerging markets over next 4-6 quarters. After strengthening initially post elections - the dollar index has depreciated over last 4 months by 15% – indicating possible flows moving towards Emerging markets and Europe. However, Europe and China's growth rates remain subdued at best. Euro area might be an eventual beneficiary of this environment as it finally moves towards policies which make it a better economic and geopolitical zone. European leaders have been forced to make serious choices for the first time in last several decades. They may start looking towards East more and India could be beneficiary of the same along with China and Others. Geopolitics remains complex and you might get bouts of escalation and de-escalation periodically in our view. China continues to have challenges on growth revival due to ageing population and leverage in households/Real estate, which are structural in our view. Commodities in general may remain muted for extended period, given that more than 30-40% of every commodity is consumed by China and the recent tariff war and its impact on exports makes the growth environment even worse for exporting countries. Only positive for China is its relatively cheap valuations and good quality listed tech companies. Eurozone would be the area to look out for over next 5 years from growth perspective. India remains one of the differentiated markets (Goods exports just ~15% of GDP) in terms of structural growth and earnings, notwithstanding cyclical slowdown that we are witnessing right now.

Indian macro remains best among the large economies and cyclical growth is normalising from last year. The last Gross Domestic Product (GDP) print came in at 7.4% in 4QFY25 after weak prints of 5.4% and 6.2% respectively for 2Q/3QFY25. FY25 GDP growth came at 6.5%. Current Account Deficit has improved significantly and is expected to be ~1% for FY25E/FY26E. Most domestic macro and micro indicators remain steady. Given these aspects, despite the global geo-political and economic dark clouds, the domestic equity market remains focused on earnings. While the structural earning growth has been healthy at >15% CAGR (Compounded Annual Growth Rate) for FY20-24, FY25E has moderated to mid-high single digit, which is a cause of concern. Thankfully 4QFY25/1QFY26 earnings have been along the expected line by consensus. Monetary policy has become very accommodative, both in terms of system liquidity (vs FY25) as well as administrative majors around lending.

We believe that FY25 was a cyclical slowdown driven by factors such as,

- 1) Reduced Govt spending during 1HFY25, which has reversed during next 2 quarters
- 2) Significantly above average monsoon in southern part of country; and
- 3) Stringent liquidity and administrative actions by RBI on retail credit (which has also reversed).

Consumption and revenue expenditure at State /Central level has started moving up. Financials, Pharma, industrials, Telecom, Hospital, Hotels, Aviation and Real Estate are witnessing a healthy earnings cycle whereas FMCG, Commodities and IT continues to face headwind. Indian equity market trades at 21x FY26E/19x FY27E consensus Nifty earnings – in a fair valuation zone from medium term perspective – given longevity of earnings growth potential in India. For the broader market, while the last years correction has taken out the froth in mid-caps and small caps, they continue to trade at 15-25% premium to their own historical valuations – indicating that the strong earnings revival is a must for this part of the market to do well.

Having discussed near term earnings challenges; we believe that Indian economy is in a structural upcycle which may come to fore as global macroeconomic challenges/flow challenges recede over next few quarters. Our belief on domestic economic up-cycle stems from the fact that the enabling factors are in place

- 1) Corporate and bank's financials are in best possible shape to drive capex and credit respectively,
- 2) Consumer spending likely to normalize given our demographics and Govt push
- 3) Government is focused on creating enabling environment as well as direct budget interventions
- 4) Real estate cycle still is in mid cycle with healthy balance sheets

This makes us constructive on India equities with 3-5 years view. We believe that India is in a business cycle / credit growth / earnings cycle through FY25-28E – indicating a healthy earnings cycle from medium term perspective. Though, watch out for tariff related risk that has emanated lately with US.

Mr. Avnish Jain
Head - Fixed Income

Global Economy Update:

Macro Backdrop:

- ▶ The global macroeconomic environment remained fluid in July so far amidst geo-political tensions and tariff policy uncertainties.
- ▶ Central banks in many advanced economies (AEs) kept policy rates unchanged, as the last mile of disinflation turned out to be stickier than expected, while also awaiting clarity on the trade tariff front and its implications for inflation.

■ Purchasing Managers' Index (PMI):

- United States: The S&P Global US Composite PMI rose to 54.6 in July 2025 from 52.9 in June 2025, marking the fastest pace of growth in 2025 and the 30th consecutive month of expansion. The upturn was driven by strong services activity, which grew at the quickest rate since December 2024.
- Eurozone: The HCOB Eurozone Composite PMI for July 2025 rose to 51.0, up from 50.6 in June 2025, marking the strongest expansion in private sector economic activity in 11 months. The increase was driven by stronger service sector activity (51.2 vs 50.5 in June 2025) and a near stabilization in manufacturing (49.8 vs 49.5 in June 2025).
- Japan: The Japan Composite PMI for July 2025 remained unchanged at 51.5, according to flash data. This marks the fourth consecutive month of private sector growth, holding steady at the strongest pace since February. The growth was driven by a faster rise in services activity, which offset a decline in manufacturing output.

■ Unemployment Trends:

- **United States:** The U.S. unemployment rate rose a little to 4.2% in July 2025 (4.1% in June 2025).
- **Eurozone:** In June 2025, the euro area seasonally adjusted unemployment rate was 6.2%, stable compared with May 2025 and down from 6.4% in June 2024.

■ Monetary Policy:

- European Central Bank (ECB):
 - ▶ Since February, the ECB slashed rates thrice by 25bps, now at 2.00%, with one more cut likely to 1.75%; signaling forceful action against persistent supply shocks.
 - ▶ ECB likely to continue gradual easing, capping ahead of next strategy review in 2030.
- U.S. Federal Reserve:
 - ▶ The Federal Reserve held rates at 4.25–4.50% in July 2025, emphasizing a data-dependent approach amid stagnant and sticky inflation and trade-related risks.
 - ▶ Fed is expected to begin easing in September–December 2025, targeting a terminal rate near 3.50% by 2026.

Inflation Trends:

Global:

- ▶ CPI inflation in major AEs registered an uptick in June 2025, with the US, Euro area and the UK witnessing a pick-up due to increase in goods inflation amidst persistence in services inflation.
- ▶ Japan, however, saw some moderation in its inflation.
- ▶ Among Emerging Market Economies (EMEs), CPI inflation edged up marginally in Brazil, while it moderated in Russia.
- ▶ However, inflation remained elevated and above the target rate in both the countries.
- ▶ China moved out of the deflation zone after four months.

Indian Economy Update:

Macro Backdrop:

- ▶ Amidst a challenging global environment, the Indian economy showed resilience.
- ▶ High-frequency indicators suggest stability in aggregate demand.
- ▶ Growth momentum was buoyant for agriculture and services sector while the growth in industrial sector remained modest.
- ▶ US imposed 25% tariff in Indian imports plus an unspecified penalty for trade ties with Russia. However, tariff dialogue continues between US-India to resolve differences.
- ▶ Higher US tariffs could impact exports and overall growth projections

■ Purchasing Managers' Index (PMI):

- ▶ The HSBC India Composite PMI decreased to 60.70 points in July 2025 from 61 points in June of 2025.
- ▶ Services activity rose at a slightly slower pace, though still robust by historical standards, while manufacturing output grew the most since April 2024.

■ Employment Trends:

- ▶ The overall unemployment rate for persons aged 15 and above remained unchanged at 5.6% in June 2025 compared to May 2025.
- ▶ Rural unemployment declined to 4.9% in June 2025, while urban unemployment increased to 7.1%.

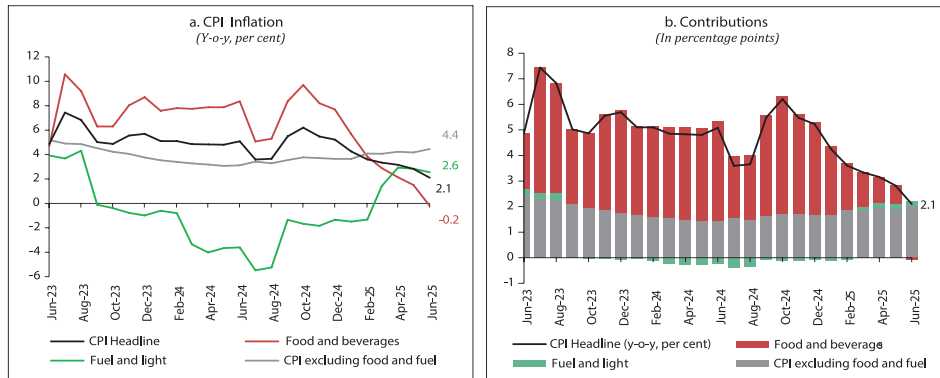

Inflation Trends:

Domestic:

- ▶ Headline CPI in India declined to 2.1% in June 2025 (the lowest since February 2019) from 2.8% in May 2025.
- ▶ For the first time since February 2019, food group registered a deflation of (-) 0.2 per cent (y-o-y) in June 2025 as against an inflation of 1.5 per cent in May 2025.
- ▶ Fuel and light inflation moderated to 2.6 per cent in June 2025 from 2.8 per cent in May 2025.
- ▶ Core inflation inched up higher to 4.4 per cent in June 2025 from 4.2 per cent in May 2025.
- ▶ In terms of regional distribution, both rural and urban inflation eased further to 1.7 per cent and 2.6 per cent, respectively, in June 2025, with a greater fall witnessed in rural inflation.

continued...

Trends and Drivers of Inflation:

Sources: National Statistical Office (NSO); and RBI staff estimates.

Bond Yields & Spreads:

- ▶ Indian yields moved sideways with upward bias as RBI Monetary Policy Committee (RBI MPC) had shifted stance to ‘neutral’ in June 2025 policy.
- ▶ Despite CPI inflation slipping to 2.1% in June 2025, rate markets remained in consolidation mode, as more than 50bps rate cut in June 2025 policy meet, reduces the chances of rate cut in the near term.
- ▶ US 10Y yield moved sideways as US FED held rates on sticky inflation and tariff uncertainty.
- ▶ Corporate bonds moved in tandem with sovereign with overall yields rising across the curve.
- ▶ Short term bonds yields rose more as further rate cuts expectations were dashed.

Outlook:

- ▶ US FED remains on hold and is dependent on incoming data on inflation and growth to assess the needs for further rate actions. US rates are likely to remain rangebound with an upward bias.
- ▶ The passage of a large expenditure bill is further clouding outlook, as higher borrowings by the US treasury may lead to higher rates.
- ▶ After pumping liquidity in early part of 2025, RBI chose to start weekly Variable Rate Reverse Repo (VRRR) auctions to withdraw short term liquidity from the system, endeavoring to bring the overnight rate near the weighted average call rate.
- ▶ Withdrawal of liquidity may lead to flattening of curve in the short end as short term rates react more to liquidity changes.
- ▶ FII flows were marginally positive in July 2025 as global rates eased.
- ▶ We expect RBI to remain on a long pause, if growth remains on track. Any change in momentum in growth trajectory may push RBI to respond, if inflation remains within target of 4%.
- ▶ Markets may remain rangebound in near term on RBI neutral stance. Liquidity is ample and RBI is trying to manage excess short term liquidity through VRRR operations. Debt Market sentiments are more likely to be influenced by geo-political tensions, and evolving US tariff situation.

PRODUCT POSITIONING

Canara Robeco Small Cap Fund is an open-ended equity scheme predominantly investing in small cap stocks. It considers companies ranked 251st and onwards in terms of full Market Capitalization as its Investment universe. The fund provides a blend of 'Growth' and 'Value' style of investing. This Fund seeks to invest in high quality small cap business which are undervalued and have a sustainable business. Further, it aims to invest in companies with consistent earnings and reasonable valuations which could lead to Alpha Generation opportunity. Fund intends to invest at least 65% in small-cap companies which have high growth potential and remaining 35% of the portfolio across Large, Mid, Small cap companies and Debt and Money Market Instruments after assessing the market conditions

PRODUCT POSITIONING

Canara Robeco Focused Fund is an open-ended equity scheme which takes a concentrated exposure in not more than 30 high conviction stocks across market capitalisation depending on the growth opportunities. The fund may benefit from the active allocation to the select best ideas with an aim to achieve optimal portfolio diversification across sectors to manage risk. The fund's portfolio focuses on high quality and high growth stocks while remaining market capitalisation agnostic but sensitive to liquidity constraints. Further, the fund strategy intends to have a good combination of 'Leaders' with proven track record across market cycles to provide stability, 'Challengers' with improving market share to provide growth to the portfolio and 'Emerging Themes' or cyclical turnaround beneficiaries.

PRODUCT POSITIONING

Canara Robeco Value Fund is an open-ended equity scheme which follows a value investment strategy. The fund intends to take exposure into equities and aims to generate long-term capital appreciation from a diversified portfolio in the Indian markets with a higher focus on companies which are trading at a discount to their 'Intrinsic Value'. 'Intrinsic Value' strategy relies on the analytical and behavioural edge to generate investor's alpha and keeps an appropriate 'Margin of Safety'. The fund has a market cap agnostic approach following a mix of bottom up and top down strategy and it aims to benefit over the full investment cycle.

BENCHMARK: CRISIL Liquid Overnight Index

FUND MANAGER : Ms. Suman Prasad

TOTAL EXPERIENCE : 27 Years

MANAGING THIS FUND : Since 24-July-19

PRODUCT POSITIONING

Fund predominantly invests in tri-party repos, overnight reverse repos and fixed income securities/instruments with maturity of one (1) business day. Fund has minimal interest rate and credit risk and tends to ensure a high degree of liquidity in the portfolio. Fund offers an alternative to corporate and individual investors who may want to park their idle funds for short period of time and expecting minimal interest rate and credit risk.

PRODUCT POSITIONING

Canara Robeco Banking and PSU Debt Fund would be an "Actively Managed Fund" that aims to capture opportunities in the interest rate cycle and mispricing on the yield curve.

The Fund will endeavour to invest in "High Grade Assets" that are either government-backed entities or systemically important private banks/entities. This potentially provides lower credit risk.

The fund is suitable for investors who have a "Medium-term investment horizon" of 3-4 years & having relatively "low to medium risk appetite" looking to invest in high credit quality bonds with good liquidity.

PRODUCT POSITIONING

Canara Robeco Balanced Advantage Fund aims to generating long term capital appreciation by managing equity and debt allocations dynamically. The Fund aims for steady growth, especially during market ups and downs making it more suitable for investors as it takes away the burden of readjusting asset allocation between equity & debt. The fund invests in a careful blend of select stocks and debt securities and it uses an in-house allocation model seeking to limit the downside risk during a falling market and aiming to capture reasonable growth in a rising market.

* On face value of ₹10. ● For Daily, Weekly & Monthly IDCW history of Canara Robeco Liquid Fund, Canara Robeco Ultra Short Term Fund & Canara Robeco Savings Fund

Visit : www.canararobeco.com. ● The IDCW amount is before tax calculation. ● *Please Refer to Notice-cum-Addendum No. 16 dated June 20th, 2025 for Change in Scheme Name

Past performance may or may not be sustained in the future. Pursuant to payment of IDCW, the NAV of the IDCW option of the scheme would fall to the extent of payout and statutory levy (if applicable).

HOW TO READ A FACTSHEET

Fund Manager

An employee of the asset management company who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Minimum Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme

Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until Maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10 –Year Gsec.

Entry Load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the exit load is 1%, the investor will enter the fund at Rs. 101.

Exit Load

Exit load is charged at the time an investor redeems the units of mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1% the investor will receive Rs. 99

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit changes in yield.

Standard Deviation

Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit or risk.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or assets under management refers to recent / updated cumulative market value of investments of a scheme managed by the mutual fund.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Total Expense Ratio

Expressed as an annualized percentage, it is the ratio of all the expenses of the fund to the total assets of the fund and includes the fund management fees paid to the asset management company for managing the fund's assets.

Sharp Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit or risk.

Beta Ratio

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Portfolio Turnover Ratio

It is a measure of how often assets within a fund are churned.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit changes in yield.

Average Maturity

It is the weighted average of residual maturity of debt securities in a fund portfolio

Portfolio Yield

Weighted Average valuation yield of the assets

Standard Deviation

Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Risk Free Return

It represents the rate of return an investor could have earned by investing in a security which is believed to have zero investment risk over the specified period of time.

Tracking Error

Tracking error is a measure of how closely is a scheme able to imitate the index to which it is benchmarked. It is the standard deviation of the difference between the scheme and index returns.

R-Squared

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

TRI

Total Return Index (TRI) is an index that measures the performance of a group of components by assuming that all cash distributions are reinvested, in addition to tracking the components' price movement. It takes into account all dividends/ interest payments that are generated from the basket of constituents that make up the index in addition to the capital gains and considered as an appropriate measure of performance.
